June's Meeting

For June thirty members and guest were in attendance for the 2 hour CE class on ASHRAE 90.1-2010 vs. the 5th Edition Florida Energy Conservation Code presented by Dave Chamberlain with Fox-Rowden-McBrayer, Inc. Once again Dave presented a great class which led to some spirited discussions. The group also enjoyed the Chicken & Dumplings and salad prepared by Dawn and the American Legion.

July's Meeting

Mr. George Valaes, Consulting Engineer Specialist with Square D Schneider Electric will be the guest speaker for July. George has over 25 year's experience in the electrical industry and is responsible for project design support, technical codes & standards updates for electrical contractors and engineering design firms throughout the State of Florida. The topics for the evening will include circuit breaker basics with a discussion of electronic vs. thermal magnetic circuit breakers. George will follow with the NEC sections that reference selective coordination and then he will explain how to best achieve selective coordination and lastly demonstrate some tools and examples on how to meet the NEC requirements. This will not be a CE Class, but the information presented will be valuable knowledge for Electrical Contractors and Designers.
